Revisions			
Rev	Description	Designer	Date
X1	Initial Draft A070 Release	Alejandro Cervantes	07/07/15
A	Prototype release	Jesus Sanchez	07/29/15
A1	Final version	Jesus Sanchez	07/23/16

CAUTION:

This schematic is provided for reference purposes only. As such, Freescale does not make any warranty, implied or otherwise, as to the suitability of circuit design or component selection (type or value) used in these schematics for hardware design using the NXP S12 family of Microprocessors. Customers using any part of these schematics as a basis for hardware design, do so at their own risk and Freescale does not assume any liability for such a hardware design.

User notes are given throughout the schematics.

Specific PCB LAYOUT notes are detailed in ITALICS

3 Different test points used in design:

TPx - Test point pad

TPHx - Through Hole Pad Large (for standard 0.1" header). Also used on IO Matrix (IOMx)

TSx - Surface Mount Wire Loop

TPx

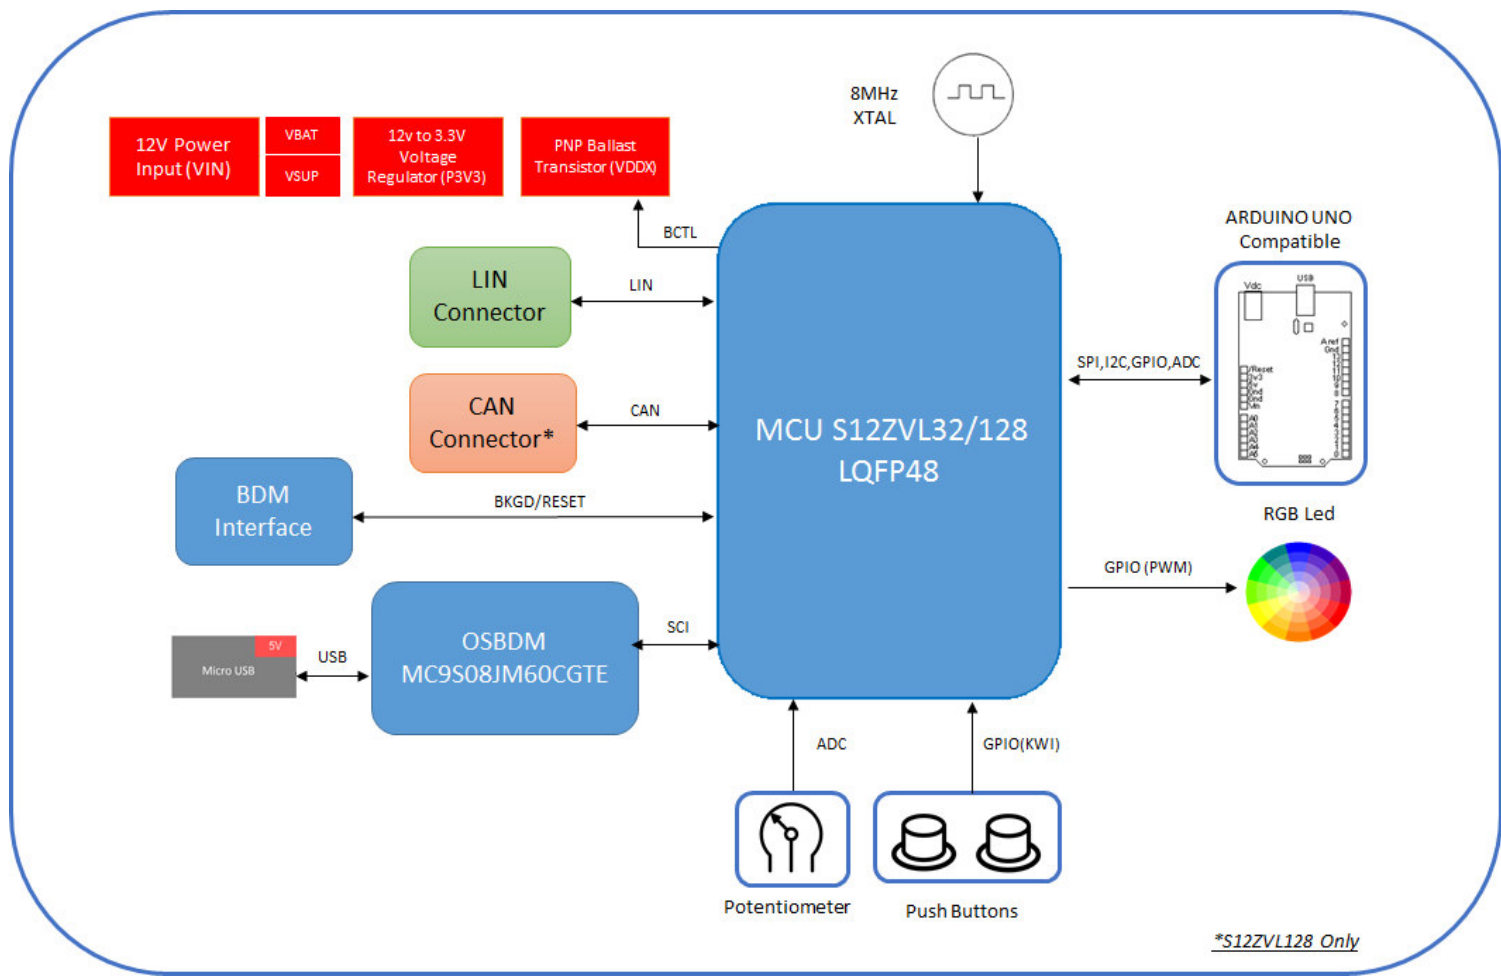

TPHx

TSx

Notes:

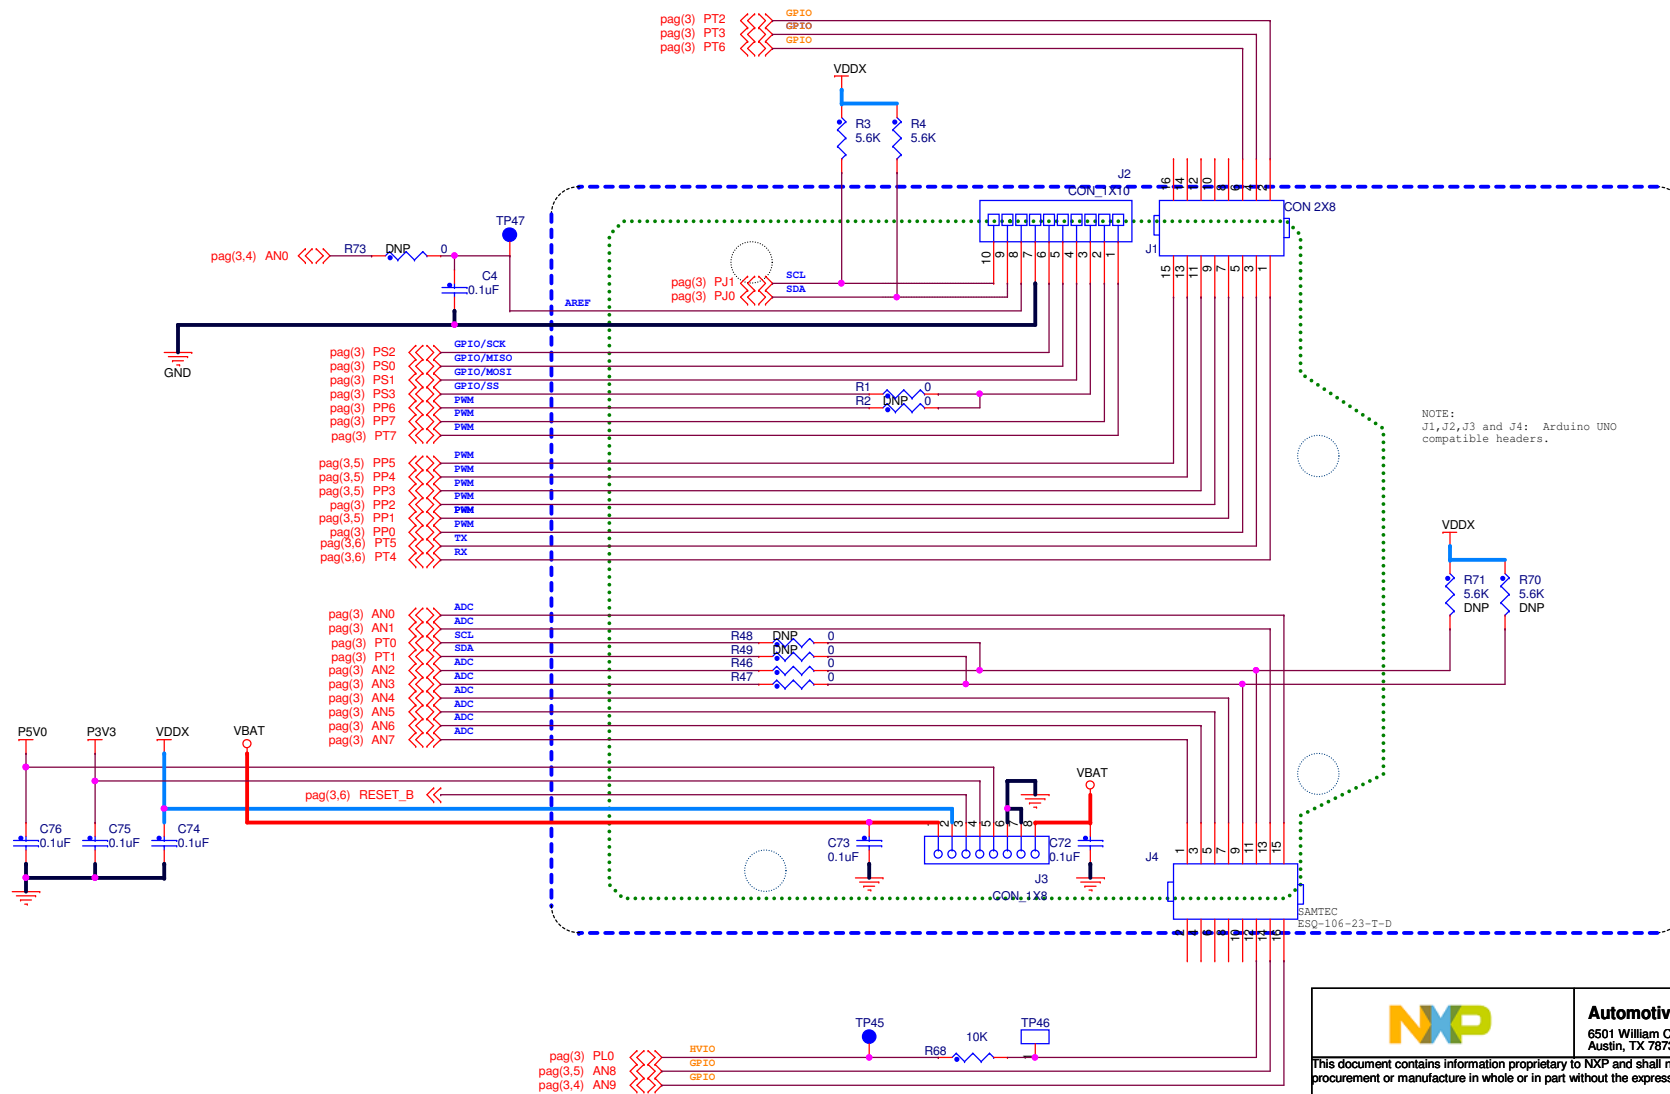

- All components and board processes are to be ROHS compliant
- All connectors and headers are denoted Jx/Px and are 2.54mm pitch unless otherwise stated
- All jumpers are denoted Jx.
- Jumper default positions are shown in the schematics. For 3 way jumpers, default is always position 1-2.
- 2 Pin jumpers generally have the "source" on pin 1.
- All switches are denoted SWx
- All test points (SMT wire loop style) are denoted TPx
- Test point Vias (just through hole pads) are denoted TPVx
